# CHALLENGE #9: Video and Forms

In this challenge. i didn't use video and forms in my Website because it's a reading article. That's why I made a new website for this.

The video in this website comes from my videos. And as you can see some of the block elements, id, class and stuff is at the top side of it. Is because I didn't use id and some stuff in my final website. Same with the form

This is the video.

This is the form

This is the code for video.

```html
  </div>

  <!-- Inline Element -->
  <span class="inline-text">This is an inline element.</span>

  <!-- ID Element -->
  <p id="unique-element">ito naman po ung sa id.</p>

  <!-- Video Element -->
  <video width="640" height="360" controls>
      <source src="osu.mp4" type="video/mp4">
      Your browser does not support the video tag.
  </video>
```

And this is the code for the Form.

```html
<!-- Form Element -->
<form action="/submit" method="post">
    <label for="name">Name:</label>
    <input type="text" id="name" name="name" required>

    <label for="email">Email:</label>
    <input type="email" id="email" name="email" required>

        <label for="comment">Comment:</label>
        <textarea id="comment" name="comment" rows="4" cols="50"></textarea>
    <input type="submit" value="Submit">
</form>
```
