CHALLENGE #8: EXTERNAL CSS AND RESPONSIVENESS
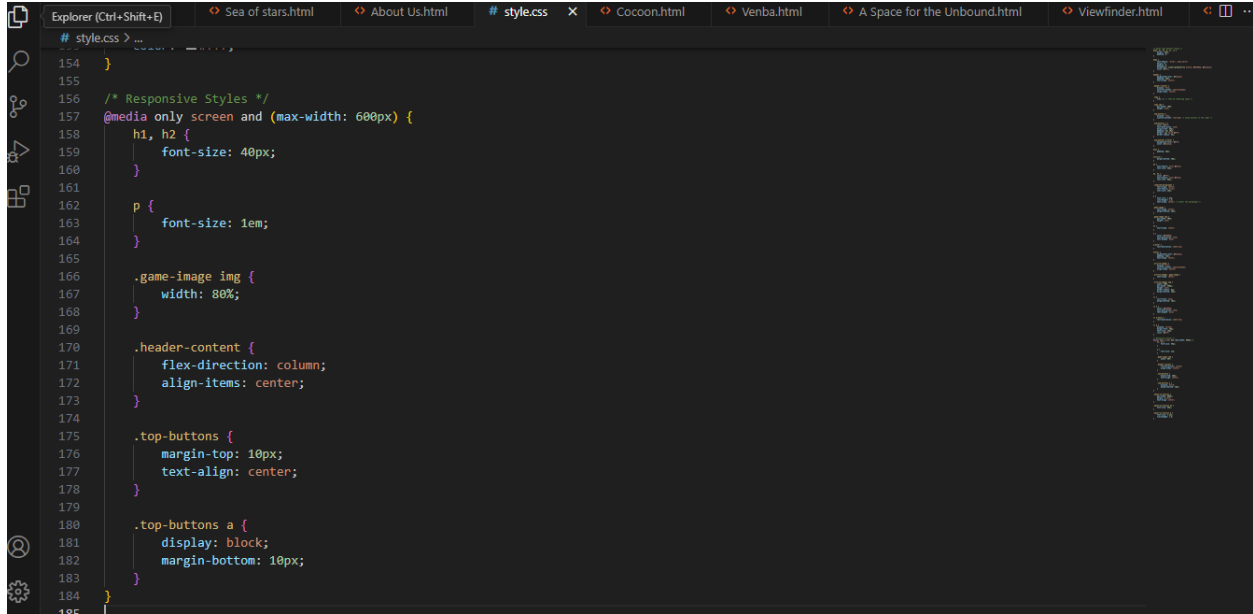

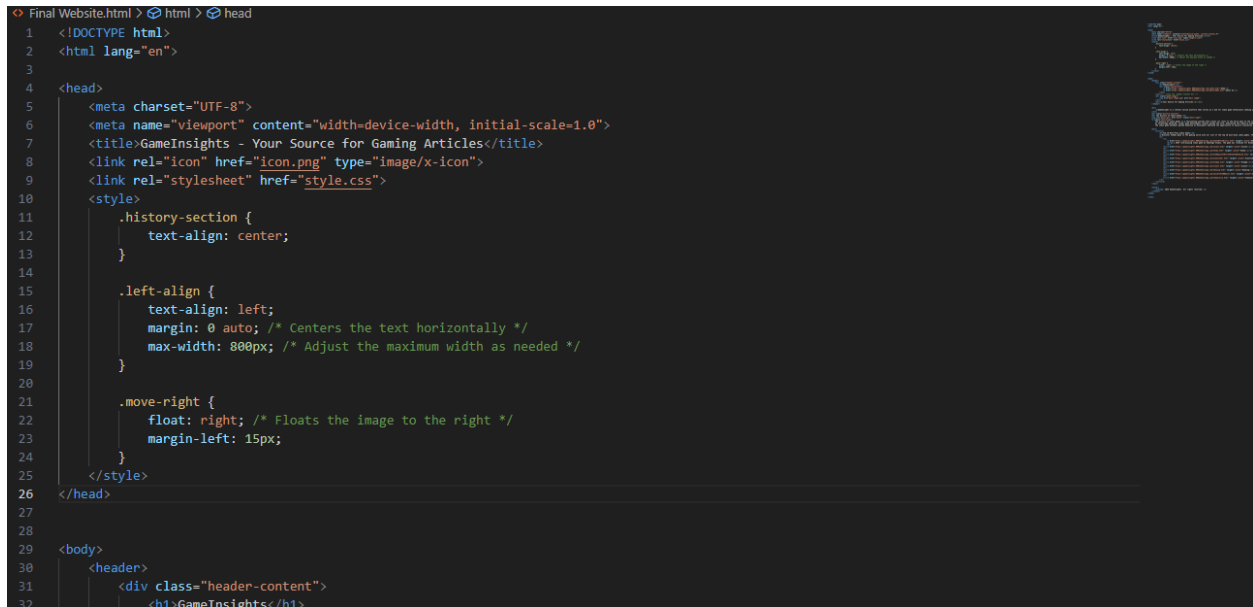

In this challenge. I use a short code for my responsiveness and it worked.

```css
}

/* Responsive Styles */
@media only screen and (max-width: 600px) {
    h1, h2 {
        font-size: 40px;
    }

    p {
        font-size: 1em;
    }

    .game-image img {
        width: 80%;
    }

    .header-content {
        flex-direction: column;
        align-items: center;
    }

    .top-buttons {
        margin-top: 10px;
        text-align: center;
    }

    .top-buttons a {
        display: block;
        margin-bottom: 10px;
    }
}
```

And for my External Css is this.

```html
<!DOCTYPE html>
<html lang="en">

<head>
    <meta charset="UTF-8">
    <meta name="viewport" content="width=device-width, initial-scale=1.0">
    <title>GameInsights - Your Source for Gaming Articles</title>
    <link rel="icon" href="icon.png" type="image/x-icon">
    <link rel="stylesheet" href="style.css">
    <style>
        .history-section {
            text-align: center;
        }

        .left-align {
            text-align: left;
            margin: 0 auto; /* Centers the text horizontally */
            max-width: 800px; /* Adjust the maximum width as needed */
        }

        .move-right {
            float: right; /* Floats the image to the right */
            margin-left: 15px;
        }
    </style>
</head>

<body>
    <header>
        <div class="header-content">
            <h1>GameInsights</h1>
```
